

Our Quality, Environment, and Occupational Health and Safety Policy

As Arkas Line, we aim to maintain our place as the sector leader through our Integrated Management System, as well as following-up and constantly improving our processes through innovative activities while providing International Multimodal Container Transport Services.

We are aware that our responsibility to our shareholders and the environment requires us to do more than the law and regulations do. Minimising the negative effect of our operations on the quality and environment, as well as the occupational health and safety, improving our performance continuously and encouraging our staff members, customers, suppliers and shareholders to adopt the same practices are the fundamentals of our policy, which is an inseparable part of our business strategy and method.

In order to practice this policy, we commit to

Be customer-oriented and ensure the continuity in customer satisfaction;

Act in conformity with the law and international agreements while providing our services, ensuring the occupational health and safety, and managing our impact on the environment;

Develop systems for occupational health and safety, as well as the prevention of occupational accidents during our operations;

Maintain our approach towards the preservation of the environment and respect for human life, reduce the potential impacts of our operations in maritime sector and any other sectors and our use of the natural resources to minimum levels;

Continuously show the best effort to reduce our carbon footprint, use the natural resources responsibly and prevent our vessels from polluting the seas;

Publish our policies and determinative performance data on regular basis;

Increase awareness through our practices and fulfil the requirements of the ISO 9001, ISO 14001 and OHSAS 18001 standards with the participation of our staff members, regularly review and update our protective measures in accordance with our policy, which is shaped by our objectives and targets.
